DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Matsueda et al(20020003521).

Matsueda et al teach a liquid crystal display comprising: a display part displaying an image in accordance with image display data(DA) supplied through data signal lines(902)(see figures 1, 6, 8, 10); and a driving part driving each data signal line(902) of the data signal lines(902) by using a plurality of driving devices(211-216, 271-276, 321-325, 341-345) together simultaneously so as to increase the driving capability, wherein the plurality of driving devices (211-216, 271-276, 321-325, 341-345) are disposed on the same side of the data signal lines(902); wherein the number of the driving devices(211-216, 271-276, 321-325, 341-345) used for driving each data signal line(902) is controlled in accordance with a particular type of the display part (different gray scale levels; e.g. 6 bits or 8 bits or N bits)(see figures 1, 6, 8, 10, 21 and

Application/Control Number: 10/023,344 Page 3

Art Unit: 2629

paragraphs 12-14 and 155), and wherein control of the number of driving devices is made with the use of a switch signal(see figures 1, 6, 8, 10 and paragraphs 92-93, 132-133 and 163).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsueda et al in view of Ichikawa et al(5,028,916).

Matsueda et al fail to disclose a wiring part provided on a substrate on which the display part is formed.

As to claim 4, Ichikawa et al teach an LCD display comprising a wiring part integrated with a display part on a substrate(14)(see figures 1, 7-11; column 7, lines 39-68 and column 8, lines 1-33). It would have been obvious to have modified Matsueda et al with the teaching of Ichikawa et al, so as to eliminate cumbersome interconnection between the display panel and the drive circuit section, and improve operation reliability, as well as a low assembly cost(see column 8, lines 18-33).

Response to Arguments

5. Applicant's arguments with respect to claims 1 and 4 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tomita et al(6,265,889) teach a plurality driving device(SW1A, SW1B) for driving a data line(X1) simultaneously.

Yamamoto et al(US 20020030648) teach an LCD display having a plurality of driving circuits.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lun-yi Lao whose telephone number is 571-272-7671. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on 571-272-7681. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
